### Five Opportunities in **Public Utility Bonds**

Public Utilities stand third in the coal priority order of the Fuel Administrator

DUBLIC UTILITIES are a powerful factor, both directly and indirectly, in the prosecution of the war.

Their efficiency and prosperity are indispensable to communities at all times. They are the arteries which feed our present-day development.

There are five public utility bond issues of unusual attractiveness, yielding from 6.00% to 6.83%, to which we invite your special attention.

### FINANCIAL NEWS AND COMMENT

Tone of Market Is Improved. Specialties and Low Priced Shares Leading.

MOST BUYING BY SHORTS

Peace Rumors and U. S. Financing Offset Trading-Liberty 8 1-2s at New Low.

Interest in yesterday's stock market centred again in the specialties and ow priced non-dividend paying shares, but a slightly better undertone was in evidence throughout the general list, with moderate improvement recorded in the standard issues on an extremely light volume of business. The change n sentiment was based largely on peace talk, and was not striking enough to invite public participation. Outside of scattered investment purchases buying power continued restricted to short covering made necessary because the re-actions which followed the recovery on Saturday and Monday had strengthened the market's technical position and made less secure the inside position of the

The most significant of the numerous rumors of peace which invaded the Street came via Petrograd to the ef-fect that the revolutionary party in Vienna had succeeded in overthrowing Vienna had succeeded in overthrewing the Government. It came soon after the opening and influenced quiet buying. Wall Street attaches much significance to the movement in progress in Austria, but it is still sceptical of such news, and was inclined to act conservatively, as the report could not be confirmed either in London or at the State Department in Washington. Reports, however, that peace is near are becoming so numerous that they are iming so numerous that they are im-

ing so numerous that they are impressing many persons.

No doubt they would have had more influence in the operations in the Stock Exchange yesterday had Wall Street known what the German Chancellor had or would say, in answer to Lloyd George's and President Wilson's peace terms. It had been reported that the Chancellor intended to make a reply during the day, and after the first influence of the Petrograd report had spent liself the Petrograd report had spent itself the market assumed a waiting attitude for the reply, which did not come. In some quarters this was considered significant. It was felt that the Austrian situation had again forced the Chancellor to postpone his reply, and that the reply might be more favorable as a result. The whole question of peace is still a matter of speculation, but it is nevertheless hard to dislodge the idea from those now in control of operations in the stock

market.
The Washington situation was not part'cularly encouraging to speculative in-centive, but some impetus was found in reports from both that city and local railroad executives that the coal and raliroad executives that the coal and transportation situation was improving. The embargoes on all freight except fuel, foodstuffs and munitions on several of the Eastern roads was not to the liking of the financial district, but satisfaction was found in the fact that progress is being made in coaling the ships tied up in the harbor. Encouragement was also found in the proposed change in the railroad legislation, which makes it definite that the railroads are to be turned back to private interests after.

tirned back to private interests after the period of the war. Sited shares were in slightly better demand, but most operations took place in the specialties. Among the most active among the latter were American Linseed preferred and common, which made new high records; Mexican Petroleum, Distillers, American Hide and Leather, sugar and the tobaccos. The general bond market was dull, about the only outstanding feature being another new low record for Liberty 31/2s, which reflected Secretary McAdoo's statement on the previous day that \$10,000,000,000

must be raised by June 30.

Money continued easier, call loans ranging as low as 312 per cent. Time funds, however, were unchanged. The foreign exchange market was again quiet, with a slightly easier tone in Iranian line.

To Observe Heatless Monday. Action of the New York Stock Exchange in-deciding to close on heatless Mondays was followed yesterday by the curb market, Consolidated Exchange, Coffee and Sugar Exchange and Metal Exchange. The Cotton and Produce exchanges are expected to fall in line before the end of the week. The Cotton Exchange was closed laht Monday, Several theories were advanced yesterday in Wall Street for the sudden change of front, in addition to the one officially ascribed by the exchange, that the call loans would be extended from Friday to Tuesday. One was the fear of a robbery of messenger boys in the darkened dis-1916. 534,275 14,256,729 of messenger boys in the darkened dis-trict; still another was the discomfort of employees last Monday; another is the fact that the business transacted on Monday was much smaller than an or-dinary Saturday business. There were even whispers around the Street yesteraven whispers around the Street yester-day that a quiet tip to shut up snop had come over the underground route from Washington on the theory that many persons in the country who dis-like to conform to the order point to the exchanges as "horrible examples" of those allowed to remain open. An in-terested statistician pointed out yesterterested statistician pointed out yester-day that of the twenty-eight days in February there will be only eighteen days on which business in Wall Street will be carried on. Counting the four Saturdays as half days, working time for the financial district will be reduced to sixteen full days. It probably will be the lightest month in the history of the district.

GOSSIP OF WALL STREET.

Distuctined to Offer Stocks

Strength of the general market yes-terday was attributed to indisposition of holders of stocks to offer them. Pro-fessional floor traders sold early in the day, but took back the shares in the afternoon, when they realized that they could not disledge stock. Notwithstanding the persistent despatches relative to disturbances in Vienna, which ordi-narily would have been accepted as indicative of a peace move, most persons in the financial district apparently do not place much credence in the idea of peace in the near future. Brokerage houses, however, which make it their business to keep in close touch with af-fairs in Washington, believe there is more back of the peace rumors than mere fiction, and some advised their customers not to sell stocks. On the other hand, they were not advising purchases

Dame Rumor's Slow Trip.

Wall Street heard yesterday that a rumor pervaded the Chicago grain pit that the Kaiser had been assassinated. Wall Street had the same rumor the day before, and a trader in one broker-age office facetiously said: "Even Dame Rumor seems to have been the victim of transportation congestion.

Government Needs Sulphuric Acid. A new angle to Tennessee Copper-In-A new angle to Tennessee Copper-in-ternational Agricultural negotiations over the sulphuric acid contract was presented by an intimation to officials of both companies that the Government would step in if the disagreement con-tinued much longer. The fact is, all the sulphuric acid that can be produced is needed, and the present contract situ-ation prevents Tennessee Copper from expanding its production, to satisfy this need. Its directors were summoned to expanding its production to satisfy this need. Its directors were summoned to a meeting yesterday afternoon, but had their journey for nothing as the result of a futile all day conference between representatives of the two companies. Premature announcement that the contract had been readjusted with mutual benefit to both companies caused strength in both stocks on Wednesday and further advances were shown yesterday. International common gaining and the preferred I point, while Tencessee Copper advanced a 15 point. The last named company will hold a board meeting next Thursday. While a satisfactory alteration of the contract should be reached shortly owing to the Government's increasing need of sulphuric acid, negotiations are far from concluded.

British Government Notes.

The British Government has notified The British Government has not need the Bankers Trust Company, as trustee of the \$100,000,000 United Kingdom 5½ per cent, one year notes, due February 1, that it will not exercise its option under the indenture and demand ten days notice of those holders who desire to convert the notes into twenty year 512 per cent, bonds of the United Kingdom, am Exp. 50 and the February 1, 1937. The conversion privilege, therefore, remains open until the maturity of the notes. It is estimated that about \$6,090,000 of the notes are either have been converted into the long term bonds or purchased in the open market for the account of the British Government and cancelled. The balance will be paid February 1 with the accumulated funds of the British Government at this centre.

Casting Sheep Eyes at the Tropics.

A Wall Street house supposed to have intimate knowledge of affairs of the Atlantic, Gulf and Weat Indies Steamship Company drops the hint that the company is planning, after the war, to invest in sugar, tropical fruit and tobacco plantations, and is conserving its pressent but a suppose of the suppose o

Company drops the hint that the company is planning, after the war, to the pany is the pany is planning, after the war, to the pany is the pany is planning, after the war, to the pany is the pany is planning, after the war, to the pany is planning and the pany is planning and pany is planning a and it has four steamers under con-struction and two others under contract.

President Edson of Kansas City Southern, with headquarters in Kansas City, was in town yesterday and took obvious pleasure in announcing that his road in 1917 earned 6 per cent. on the \$30,500,000 common stock. Its earnings have risen steadily from 1 per cent. in 1915 to 2.97 per cent. for the year ended June 30, 1916, and to 3.97 per cent. for the calendar year 1916. The showing is the calendar year 1916. The showing is considered a vindication of L. F. Loree's judgment. Against an undertone of ob-jection from other members of the board he had carried out a programme of grade reduction and equipment expan-sion. As a result trainload was doubled and in a year when most roads suffered considerable loss in net operating in-come this road gained \$570,000 and had come this road gained \$270,000 and had record earnings for the common stock. When President Wilson announced his rail programme this stock rose only three or four points to 18%, and the last sale was made at 16. The inactivity is partly due to the fact that the proposed Government guarantee permits

the coard was reduced to sevemeen members by the elimination of three positions that had been vacant.

The New York Coffee and Surar Exchange membership of J. Aron has been sold to Block. Maloney & Co. for \$1,200, an advance of \$80 over the last previous sale.

Gold com to the amount of \$250,000 has been withdrawn from the Sub-Treasury for shipment to South America.

Sutton & Co. are offereing a new issue of three year 7 per cent. notes of the Huriburt Notor Truck Company.

The committee on admissions of the New York Stock Exchange yesterday elected the following as members: Max Biegel. Henry C. Jennsen and Edward F. Hutton. The committee authorised the substitution of James Couper Lord for William Baylis, Jr. Demand for City Revenue Bills. The enthusiastic manner in which New York bankers hurled around offers of money for city revenue bills yesterday merning is indicative at least that there is a considerable amount of unemployed funds hereabout. Of course the city revenue bills are particularly attractive to the banks, but such a spectacle as \$45.000.000 being offered for a \$5.000.000 need is unusual, even in tacle as \$45.000,000 being offered for a \$5,000,000 need is unusual, even in times when money is presumed to be easier. Thirty-three bids for the bills were received, and the average rate offered by the successful bidders was a little better than 4½ per cent. J. P. Morgan & Co. got \$1,000,000 at 4.54; Salomon Bros.-Hutsler, \$1,000,000 at 4.52, and \$720,000 at 4.55; Callaway Fish Company, \$100,000 at 4.55; Callaway Fish Company, \$100,000 at 4.55; Remick Rodge Company, \$1,000 at 4.55; Remick Rodge Company, \$1,000 at 4.55.
